

IRONVISION

AI-POWERED CYBERSECURITY, COMPLIANCE & DEVSECOPS

ABOUT US

IronVision is a trusted provider of Cybersecurity, Cloud Engineering, and Compliance Automation solutions for the Federal Government.

We help agencies modernize security operations, accelerate Authority to Operate (ATO), and maintain continuous compliance through AI-powered automation and enterprise-grade cloud architectures.

Our expertise spans Network Defense, DevSecOps, RMF, Cloud Services, and AI, enabling agencies to reduce risk while increasing mission effectiveness.

CORE COMPETENCIES

- Cybersecurity Engineering & Risk Management Framework
- Cloud Engineering (AWS GovCloud & Azure Government)
- DevSecOps, CI/CD & Platform Engineering
- Network Defense & Security Operations

OUR STORY

Founded to solve complex cyber security and cloud modernization challenges, IronVision delivers trusted engineering and mission-focused solutions to the Federal Government. We use technical expertise with agile execution to help agencies achieve secure, compliant systems.

OUR VISION

To be the Federal Government's trusted small business partner for cyber security, cloud modernization, and emerging technologies.

OUR MISSION

To deliver innovative cybersecurity, cloud, DevSecOps, and AI-enabled solutions that strengthen national security, reduce risk, and help Federal agencies accomplish their missions with confidence.

IRONVISION AI

NEXT-GENERATION GRC PLATFORM

IronVision AI is a next-generation Governance, Risk, and Compliance (GRC) platform that transforms compliance from a reactive, manual process into a real-time, intelligence-driven capability.

Organizations today struggle to manage overlapping requirements across frameworks like NIST, CMMC, HIPAA, ISO 27001, and GDPR while simultaneously proving compliance and maintaining security.

IronVision AI solves this challenge by automatically mapping policies, technical controls, and evidence across multiple frameworks, continuously monitoring compliance posture, and identifying risks before they become audit findings or security incidents.

PAST PERFORMANCE

NBIS CLOUD & DEVSECOPS MSP

Customer: Defense Counterintelligence and Security Agency (DCSA)

Contract: HS002125FE047

Prime

Contractor: Omni Federal

Role: Cloud & DevSecOps MSP Subcontractor

Project Highlights

- Supported modernization of the National Background Investigation Services (NBIS) platform
- Delivered secure cloud and DevSecOps capabilities
- Supported secure cloud landing zones
- Implemented automation capabilities
- Supported Continuous Authority to Operate (cATO)
- Supported RMF and NIST 800-53 requirements
- Assisted STIG implementation
- Supported DoD Zero Trust initiatives

ARMY DCO CYBER ANALYTICS

Prime Contractor: Metronome

Contract: W52P1J-22-F-0031

Role: Cyber Security Lead

Project Highlights

- Provided Cyber Security Lead support for Army efforts to improve cyber threat detection, situational awareness, and RMF compliance
- Supported integration of cyber analytics into DISA's Big Data Platform (BDP)
- Reviewed and advised on RMF artifacts (ATO/IATT)
- Provided technical leadership to support FISMA, IAVA, and STIG implementation
- Guided secure design, sustainment, and operational cyber strategies
- Implemented DISA STIG requirements
- Supported cyber-resilient system development
